NAB Attention Index	112	79.0	High Average
NAB Executive Functions Index	106	66.0	Average
NAB Language Index	99	47.0	Average
NAB Memory Index	96	39.0	Average
NAB Spatial Index	121	92.0	Above Average
NAB Total Index	110	75.0	High Average
WRAT-5			
Word Reading	113	80.7	High Average

Note: Index scores have a mean of 100 and a standard deviation of 15.

Table 1: Composite intellectual and neuropsychological index scores

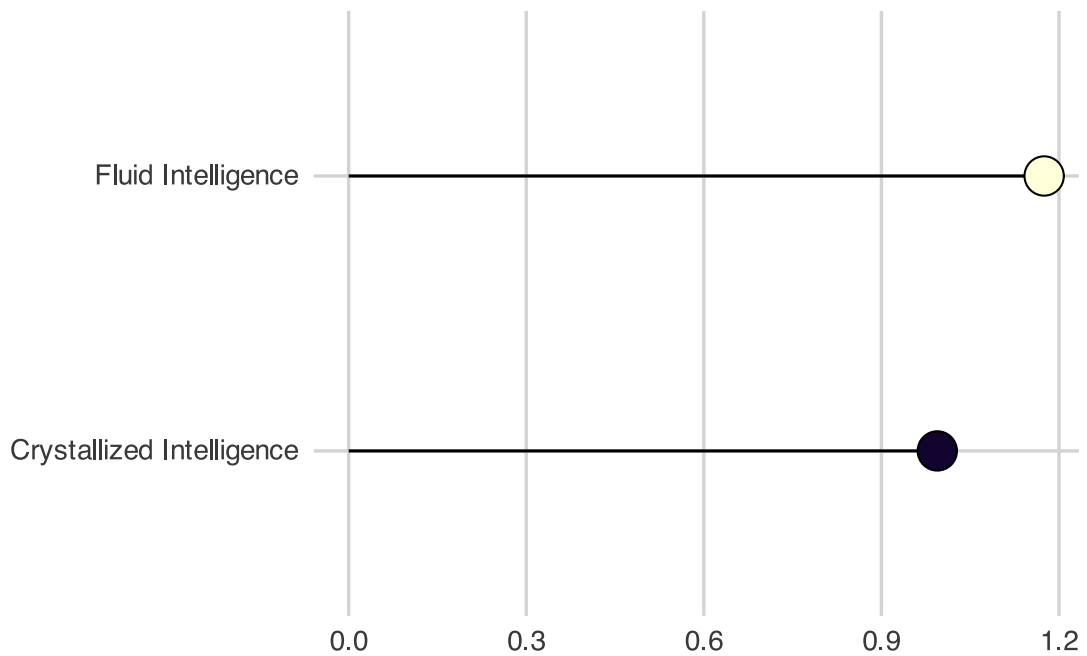

Figure 1: *General Ability* refers to an overall capacity to reason, to solve problems, and to learn useful information. *Crystallized Knowledge* refers to the ability to learn and use language to reason and understand how the world works. *Fluid Reasoning* refers to the ability to use logical reasoning to figure things out without being told exactly how things work, analyze and solve novel problems, identify patterns and relationships that underpin these problems, and apply logic.
